**AMENDED**

19. (New) A transfer apparatus for transferring a template or the customized contour of an object or shape as set forth in claim 1, wherein said foam member is able to be manufactured to any length.
20. (New) A transfer apparatus for transferring a template or the customized contour of an object or shape as set forth in claim 1, wherein said adhesives are resistant to dust or dirt that some work environments might create. Small amounts of contaminants will not pollute the surfaces that need to be adhered to by the first or second adhesive surfaces.
21. (New) A transfer apparatus for transferring a template or the customized contour of an object or shape as set forth in claim 1, wherein said foam member outlines the perimeter area, allowing for objects or shapes with interior obstacles to not interfere with the adhesive connection of the first of second surfaces.
22. (New) A transfer apparatus for transferring a template or the customized contour of an object or shape as set forth in claim 1, wherein said foam member outlines the perimeter area allowing the end user to select left or right side of the foam as the reference line. Creating more options for installation.
23. (New) A transfer apparatus for transferring a template or the customized contour of an object or shape as set forth in claim 1, wherein said foam member being able to be made to any customized length is suitable for a metric or standard liner measurement environment. Not limited to a predestined template for one purpose.
24. (New) A transfer apparatus for transferring a template or the customized contour of an object or shape as set forth in claim 1, wherein said foam member can be removed or remain on the second surface. The remaining foam can ad in the purpose of insulation, absorb possible vibration or act as a gasket.
25. (New) A transfer apparatus for transferring a template or the customized contour of an object or shape as set forth in claim 1, wherein said foam member is flexible and adaptable to attach securely to all types of surfaces, uneven, beveled, or non-smooth surfaces without template or customized contour shrinkage.
